

FOR SCIENCE AND MATHEMATICS EDUCATION
"Encouraging excellence in science and math education"

Welcome to the STEM Networks of DFSME

Through recent contacts with our staff or Board members, you and/or your organization have expressed an interest in receiving our newsletters, joining our "email gatherings", attending our events, etc. To be most effective, it is a two way street where we want to identify you and your strengths and needs to others as well.

All we need from you is:

1. A well-written one page summary of who you are, what you do and how a casual user can access your websites, contact info, etc. Just draft it and email to Karen McDermott (mcdermke@outlook.com) or Randy Guschl (guschlrj@gmail.com).
2. We are interested in your needs and interests and offer focus on the following. Please advise which information you would like to receive.
 - National and Local STEM Communications
 - Students, Equity and Diversity in STEM
 - The Delaware Program with Million Women Mentors
 - Workforce Development and Manufacturing
 - Working with State Government (and National) on STEM Policy and Practices
 - Higher Ed Partners in P-12 STEM
 - STEM Educators and Professional Development
 - Other STEM Organizations to network with
 - DFSME Events and Gatherings
3. We are also interested in Technology areas and industries which are your areas of primary focus:
 - STEM in Food and Ag
 - STEM in Healthcare
 - STEM in IT
 - STEM in Material Science and Chemistry
 - STEM in the Biosciences

And we hope you will periodically check our newly redesigned website www.dfsme.org and follow us on FACEBOOK.
