

Chet Benham
Founding Partner, North Pass Technology Strategies LLC

Following a 22-year career at Air Liquide finishing in the role of CEO of the Advanced Technologies businesses for the Americas, Chet is now the founding partner in North Pass Technology Strategies LLC.

North Pass is a Delaware-based consultancy that specializes in the deployment of gas processing technologies across a spectrum of markets, most importantly renewable energy. Chet is passionate about technology and fighting climate change and has dedicated the second half of his career to matching those two passions.

Although Chet spent his youth in the United Kingdom and Oklahoma, he has made Delaware his home for more than a decade now. Prior to that, Chet has worked in Houston, Dallas, Wisconsin, Boston & Paris.

Chet holds a bachelor's degree in Economics and an MBA from the University of Houston system.

Chet lives in the Wilmington area. He and his wife Allison, a former elementary teacher, have three children, all of whom are products of the Red Clay Consolidated School District. His oldest daughter graduated from The University of Delaware and resides in New York City. His son is a Finance and Accounting major at UD and his youngest is at St. Mark's High School having finished her primary education in Red Clay.
