

Project Engineer

At Croda, Project Engineers use their technical expertise to improve the functionality, efficiency, and reliability of our manufacturing facilities. You will play a major role in ensuring that all engineering and maintenance operations on our site run smoothly. You will have the opportunity to assist with the design, development, and implementation of new systems to optimize the creation of innovative ingredients for the consumer care and pharmaceutical industries. To succeed, you will need to be someone who is well-organized, a team player, and a creative problem-solver.
