

How YOU Can Support STEM Efforts with Help from DFSME

Join Our Efforts

Our *Advocacy to Action* is change for a world-class STEM presence in Delaware Education. We work hard in preparing EVERY student in Delaware to be competitive in the global workforce and to be empowered with opportunities granted through STEM Equity and Excellence.

We work in collaboration with community leaders, legislators, funders and educators to put into action leading-edge ideas and impactful change. We connect like-minded people, resources and concepts that encourage students to engage in STEM.

We work with DDOE, the Delaware STEM Council and local government to help strengthen our state's workforce by implementing systemic reform, ensuring all Delaware students access to high-quality STEM education – leading to a strong STEM-based economy in Delaware.

We provide teachers and administrators Professional Development on best practices and improvements in STEM programs. We reach over 2,600 teachers and business leaders to share news, events and insights along with successes and important educator recognition.

Be a Sponsor, Friend or Volunteer

Join our STEM ecosystem partnerships, actions, communications and advocacy!

- Share your professional career skills and experience in classrooms.
- Join our STEM SPOT discussions and become a part of our network.
- Volunteer and share your passions with educators, students & business.
- Support Seed Grants and Mini Grants – your donation is tax-deductible.
- Fund bus trips and afterschool programs impacting students directly.

Let's continue the conversation! Contact Randy Guschl at guschlrj@gmail.com.
